DETAILED ACTION

Election/Restrictions

The status of the claims now is as follows:

Claims 8-18, 20-32, 34-42, 49-64, 66, 67 and 77 are pending.

Claims 36-42 and 60-64, 66 and 67 are still withdrawn from consideration.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 8-18, 20, 21, 27-32 and 77 are rejected under 35 U.S.C. 102(b) as being anticipated by Watanabe et al. (US 5,344,808).

Watanabe discloses a data carrier (see Fig.'s 12 and 15) which is manufactured and thereafter issued for use, the data carrier having a body provided with a multiplayer, optically variable element comprising metal diffraction structures (14 of

Art Unit: 2872

Fig. 12) having a contour and being common to a plurality of data carriers, the diffraction structures presenting visually recognizable information (line 58 to line 59 of Col. 27), wherein the data carrier is provided with an alteration in a portion of the optically variable element, the alteration comprising a modification of the contour of the diffraction structures (300 of Fig. 12; 400 of Fig. 15). The alteration comprises replacing the diffractive structure of the contour in at least one partial area (see Fig. 12). The data carrier is provided with printed pattern (see Fig. 12C), said printed pattern being at least partially overlapped by the optically variable element, wherein the printed pattern being visible through the diffraction structures (see Fig. 12).

Regarding claims 14 and 16, Watanabe discloses the data carrier comprising a metal layer of colored appearance or one layer being colored (line 40 to line 57 of Col. 11).

Regarding claims 17 and 20, Watanabe discloses the layer of the variable element being colored with a substance comprising dyes, luminescent substances, transparent luminescent substances or absorbent substances and the printed pattern being a transparent luminescent (line 54 of Col. 13 to line 28 of Col. 14, claim 6).

Allowable Subject Matter

Claims 22-26, 34, 35 and 49-59 are allowed.

Claims 22 and 23 are allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest the alteration comprising replacing the diffraction structures by nondiffractive structures in at least one partial area as set forth in the claimed combination.

Claims 24-26, 34, 35 and 49-59 are allowable over the prior art for at least the reason that the prior art fails to teach or reasonably suggest the alteration comprising a partial removal of at least one layer of the optically variable element as set forth in the claimed combination.

Response to Arguments

Applicant's arguments have been considered but are moot in view of the new ground(s) of rejection.
